**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-5 and 7-11 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to a system for testing subscriber lines. A Remote Terminal Unit (RTU) at the subscriber end is connected between the splitter of the subscriber end and the subscriber line via a relay. A broadband line testing control module in DSLAM remotely controls off/on status of this relay, thereby controls RTU to connect to or disconnect from the subscriber line and subscriber splitter, making it convenient for corresponding subscriber line testing. In the present invention, a remote terminal subscriber access control module is added at the subscriber line between an RTU and a broadband line testing control module, in this way, when the broadband testing control module starts to implement subscriber line testing, remote controlling RTU to automatically disconnect from the subscriber line can be realized through remotely controlling the switch status of the remote terminal subscriber access control module, and automatic connection between the RTU and the subscriber line can be restored after completion of subscriber line testing. Therefore, the problem of poor testing precision or unable to perform corresponding test due to the existence of RTU in subscriber line is effectively avoided. Meanwhile, since remote control of RTU's accessing to or disconnected from subscriber line is implemented in the present invention, the subscriber line testing performed by the broadband testing control module needs no manual operation, which is greatly convenient for periodically testing subscriber lines by DSLAM end and recording subscriber line health file,

henceforth in favor of real-time inspection of subscriber line quality and fast positioning of subscriber line breakdown.

Prior art of record failed to teach or fairly suggest in combination the structure of a test system for remotely testing subscriber line in a DSL system as claimed in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
